

Zotero 6.0

Open-source reference management software

Valérie DURIEUX, PhD

Spécialiste de l'information documentaire
en Sciences de la Santé
valerie.durieux@ulb.be

Autumn 2022

ZOTERO

- **Open source bibliographic management software (free)**
- Since version 6.0, only standalone version compatible with Safari, Chrome, Firefox and Edge
- Collects bibliographic references on the web
- Stores and manages bibliographic information but also document captures, reading notes,
- Generates citations and formatted bibliographies
- Other software :
 - Endnote (licence at ULB), Citavi (paying)
 - Mendeley (free)

Information literacy: perceptions of Brazilian HIV/AIDS researchers.

Alvarez Mdo C¹, França I Jr, Cuenca AM, Bastos FI, Ueno HM, Barros CR, Guimarães MC.

Author information

Abstract

BACKGROUND: Information literacy has evolved with changes in lifelong learning. Can Brazilian health researchers search for and use updated scientific information?

OBJECTIVES: To describe researchers' information literacy based on their perceptions of their abilities to search for and use scientific information and on their interactions with libraries.

METHODS: Semi-structured interviews and focus group conducted with six Brazilian HIV/AIDS researchers. Analyses comprised the assessment of researchers as disseminators, their interactions with librarians, their use of information and communication technology and language.

RESULTS: Interviewees believed they were partially qualified to use databases. They used words and phrases that indicated their knowledge of technology and terminology. They acted as disseminators for students during information searches. Researchers' abilities to interact with librarians are key skills, especially in a renewed context where libraries have, to a large extent, changed from physical spaces to digital environments.

DISCUSSION: Great amounts of information have been made available, and researchers' participation in courses does not automatically translate into adequate information literacy. Librarians must help research groups, and as such, librarians' information literacy-related responsibilities in Brazil should be redefined and expanded.

CONCLUSIONS: Students must develop the ability to learn quickly, and librarians should help them in their efforts. Librarians and researchers can act as gatekeepers for research groups and as information coaches to improve others' search abilities.

Abstract
 Current nonpharmacological approaches, including diet and exercise interventions, for preventing and treating gestational diabetes mellitus are effective for less than 50% of women. Recent evidence suggests that the gut microbiome is integrally involved in maternal glucose homeostasis. Changes to the composition and metabolic behavior of the gut microbiota may play a role in the development and persistence of neonatal diabetes mellitus. Thus, there is growing interest in

TAG YOUR REFERENCES

The screenshot shows the Zotero application window. On the left, a sidebar contains a tree view of the library structure. A red circle with the number '1' is positioned over the 'EBM' folder. The main window displays a table of references with columns for 'Titre', 'Créateur', 'Année', and 'Date d'ajout'. The 'EBM' folder is selected, and its contents are listed in the table. In the top right corner, there are tabs for 'Info', 'Notes', 'Marqueurs', and 'Connexe'. A red circle with the number '2' points to the 'Marqueurs' tab, which is active and shows a list of tags: '5 marqueurs : Add', 'Europe', 'Family', 'Gender', 'Migration', and 'Polices'. Each tag has a small icon and a minus sign to its right.

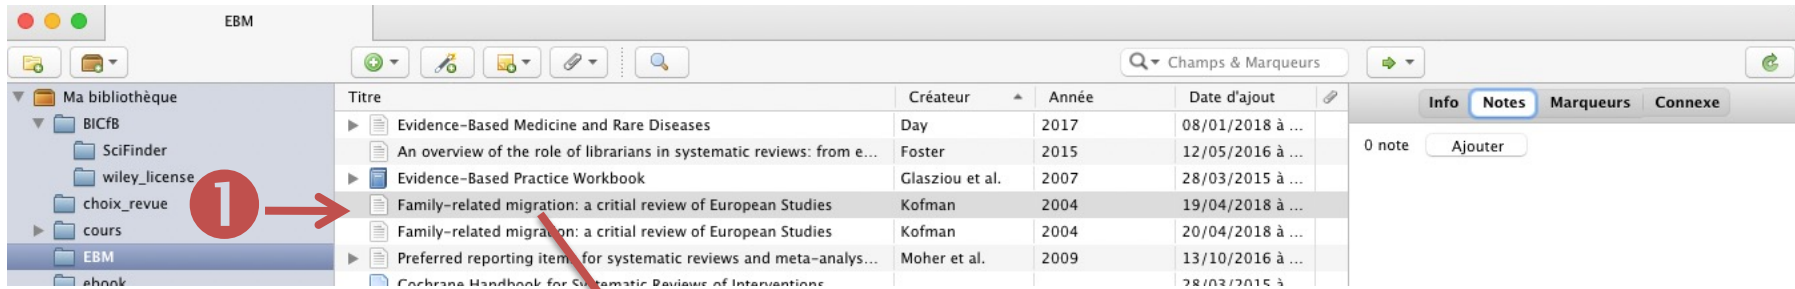

N.B. : Automatically retrieved if set in Preferences

The screenshot shows the 'Générales' (General) preferences window in Zotero. The window has a title bar with 'Générales' and a toolbar with icons for 'Générales', 'Synchronisation', 'Recherche', 'Exportation', 'Citer', and 'Avancées'. Below the toolbar, there are sections for 'Gestion des fichiers' and 'Divers'. In the 'Gestion des fichiers' section, there are several checkboxes: 'Faire une capture automatique de la page lors de la création de documents à partir de pages Web' (checked), 'Joindre automatiquement les fichiers PDF associés lors de l'enregistrement d'un document' (unchecked), 'Récupérer automatiquement les métadonnées des PDF' (checked), and 'Renommer automatiquement les pièces jointes en utilisant les métadonnées parentes' (checked). Below these, there is a dropdown menu for 'Ouvrir les PDF avec' set to 'Zotero'. In the 'Divers' section, there is a checkbox 'Ajouter automatiquement aux documents des marqueurs à partir des mots-clés fournis' which is checked. A red arrow points to this checkbox.

SEARCH YOUR LIBRARY

Advanced

Basic

The screenshot shows a library search interface with a search results table and an advanced search dialog box. A red circle highlights the search icon in the top toolbar, with red arrows pointing to the 'Advanced' and 'Basic' labels above it. The search results table lists various titles, creators, years, and dates. The advanced search dialog box is titled 'Recherche avancée' and shows search criteria for 'Ma bibliothèque'.
